

# *About Your PowerBook 145*

Congratulations! You have purchased the latest in the line of Macintosh PowerBooks. The PowerBook 145, with its faster speed of 25 megahertz, is designed to offer greater performance.

As you work with your new PowerBook, there are a few things you should know. The documentation that came with your Macintosh contains references to the PowerBook 140, the predecessor to the PowerBook 145. These two computers are identical except for the improvement in processing speed of the PowerBook 145.

All of the references to the PowerBook 140 in your manuals also apply to the PowerBook 145. In addition, any of the Apple accessories and options for the PowerBook 140 that are listed in your books will also work with the PowerBook 145.

We hope that you will enjoy working with your new Macintosh PowerBook.
