

### **About the Drive Setup 1.3.1 CD**

This CD contains Drive Setup 1.3.1, a newer version of Drive Setup than the version that's installed on your computer or included with system software version 7.6.1 or 8.0.

Drive Setup 1.3.1 updates software on your computer to prevent a rare event in which you may lose files on your hard disk or the computer is unable to start up using your hard disk. For more information about Drive Setup 1.3.1, see the Read Me file included on the CD.

### **Who should use Drive Setup 1.3.1**

You should use Drive Setup 1.3.1 to update your computer if you have a Macintosh Performa or Power Macintosh 5400, 5500, 6360, 6400, or 6500 series computer or the Twentieth Anniversary Macintosh.

### **When to use Drive Setup 1.3.1**

- Immediately after you set up your computer for the first time
- Any time you install system software version 7.6.1 or 8.0 on your computer
