

Important Information About Your PC Compatibility Card

Your Power Macintosh 4400 or 7220 has a PC Compatibility Card already installed. Please note the following warning about removing and reinstalling the card in another computer.

WARNING Do not install the card that came installed in your Power Macintosh 4400 or 7220 into any other computer. Using this card in another computer could damage the system or cause random crashes. Only a Power Macintosh 4400 or 7220 model can accommodate the power requirements of this card.

This warning also appears in your *Technical Information* booklet, and information regarding this warning appears in your *PC Compatibility Card Update*.
