

Update to the *Apple Multiple Scan 14 Display User's Guide*

There is an error in the table on page 37 of the *Apple Multiple Scan 14 Display User's Guide*. Power Macintosh 6100 series computers (including the Macintosh Performa 6116CD) support only a screen resolution of 640 x 480 with this display and not the resolution of 800 x 600 as noted.
