

Welcome to the GeoPort Telecom Adapter Kit

The Geoport Telecom Adapter Kit includes the following software:

- **Apple Telecom Software** See the *Apple Telecom User's Guide* for information on setting up your GeoPort Telecom Adapter and installing the Apple Telecom Software, which is included as a two-disk set. The *Apple Telecom User's Guide* also provides information on how to get the most out of your fax and modem software.
- **MegaPhone from Cypress Research** MegaPhone is a screen-based telephony application program that is included on its own disk. The MegaPhone installer installs the program and its associated files in a folder named MegaPhone on your hard disk. The user's guide is provided in electronic form and is located in the MegaPhone Docs folder within the MegaPhone folder.
- **SITcomm Special Edition from Aladdin Systems** SITcomm Special Edition is a general-purpose telecommunications program that is included on its own disk. The SITcomm Special Edition installer places the SITcomm Special Edition program and associated files in a folder named SITcomm Special Edition Folder on your hard disk. The user's guide, along with extra information about this software, is provided in electronic form and is located in the Read Us First folder within the SITcomm Special Edition Folder.
