

About Your PowerBook 165

Congratulations! You have purchased the latest in the line of Macintosh PowerBooks. The PowerBook 165, with its faster speed of 33 megahertz, is designed to offer greater performance.

As you work with your new PowerBook, there are a few things you should know. The documentation that came with your Macintosh contains references to the PowerBook 160, the predecessor to the PowerBook 165. These two computers are identical except for the improvement in processing speed of the PowerBook 165.

All of the references to the PowerBook 160 in your manuals also apply to the PowerBook 165. In addition, any of the Apple accessories and options for the PowerBook 160 that are listed in your books will also work with the PowerBook 165. Please also refer to the Technical Information sheet in the Apple Resource Guide.

We hope that you will enjoy working with your new Macintosh PowerBook.
